Blue Books vs. Jingle Bells

Several weeks ago, we reported that the Student Council had submitted to the faculty a request that no tests lasting a half-hour or longer be given during the week preceding Christmas vacation, for the convenience of working students who must put in extra time during the holiday rush. As yet, there has been no response from the faculty.

No one questions that we are here primarily to be educated. We know that classes and studies come first, but for five short days once a year, couldn't exams play second fiddle to our seasonal financial problems? There is an old tradition which decrees that scholars shall ever be penniless. Scholars or not, penniless just about describes most of us, especially at this time of the year. Christmas jobs are consequently necessary, and we ask that the faculty please cooperate by not scheduling exams for December 12 to 17, so that the process of becoming solvent need not mean that marks will drop below parity.

This matter brings to mind the useful little test schedule worked out by the Student Council last year, to operate as a full time project. Each class was alloted a specific day of the week for exams. Students and faculty were enthusiastic, and everyone was going to live happily ever after. Somehow, the honeymoon didn't last very long, as anyone who has been unfortunate enough to take four hour exams in a row can testify.

We'd like to see those exam schedules dug out of desk drawers and looked at once in a while

Keep Christmas With 'CARE'

With the coming of snow and the cold weather, the spirit of Christmas is really in the air. We see the lights and holly wreaths, and begin to think about the presents and parties that go with Christmas. But let's stop and think about the Christmas of other people. There are many under-privileged families in the world who aren't going to enjoy the presents and parties that we will enjoy. They haven't even enjoyed being warm or well-fed for as long as some of their children can remember.

You can brighten the holidays for one of these unfortunate families by sending them a CARE package. In five, ten, and fifteen dollar sizes, these packages of food supplies can be sent either to the specific family of your choice or to any family where the need is greatest. There's still time if you hurry. G.H.

Santa Babu Dear Santa

Dear Santa: Once again we, the *Albrightian*, have put on our thinking caps and have decided what you could bring us from your bag of make believe. This year we want a campus utopia!

Pretty unique, huh, Santa. What? you don't know what we mean? Well, it's really a sort of dream campus for Albright and if you really bring it, we all promise to Students.

Here is the whole plan. We need better bus service to and from Read-ing; therefore we suggest a limboarding students. The expense of this system can be included in our tuitions. Next, on our long list, is a quiet garden spot, for out-of-door students who despise the hammer-ing of a piano and the hushing of librarians

librarians. In order to save time while pass-ing classes, we need a moving side-walk system which travels about fifty miles per hour. To supplement the moving sidewalk, escalators must be placed in each building.

The weather will be controlled by atomic energy with the use of an ever-glowing sun and atmosphere lamp which will banish chapped hands and lips. For our sports-minded students,

we request an outdoor swimning pool, an ice-skating and hockey rink, and ping-pong tables without balconies.

The co-eds hope that you will be able to install automatic wash ma-chines and ironers in their dormi-tories and each lad has his fingers crossed for an automatic pants A huge restaurant, with all kinds

of good foods, is desperately needed because the bookstore gets very crowded at certain times.

crowded at certain times. For night activity, we would like an educated man's night club. A place with enough tables and chairs for all our students plus a name-band every Saturday night. Santa, we suppose there is little chance of our really getting this campus utopia—but we can dream, out wa?

can't we?

'Le Jazz Hot' Has Cooled Down In Modern Musical Concepts

Three weeks ago, we had a con-ert in modern jazz during assembly. It was the intention of this concert to familiarize our stu-dent body with this new approach music and its harmonic to Drop erties.

Modern jazz allows the performers and the audience to express their inner-most feeling. Imagination and originality are two important fac-tors which the jazz musician must

Too many people have the wrong impression of jazz suppressed in their minds, and because of this, they refuse to listen to any type of jazz. As soon as a musician jumps around or "honks" his horn in a loud maner, some people think he is playing jazz. This method is the extreme opposite of modern jazz, because modern jazz consists of "cool" sound.

Harmonic pattern, not volume, is the characteristic of a cool sound. The modern musician cannot jump or put his body through contortions because he must be "relaxed" in order to play his best. If the musiclans aren't relaxed, the combo won't swing, and the ambition of all good jazzmen is to have a "swing combo."

The basis of all good jazz is im-provision. By improvision I mean that the jazzman composes a new melodic line for the tune he is playing. He will take any selection he desires, and use its basic chord changes as a frame upon which he will build and express his feelings and ideas.

Classical music is playing an important role in modern jazz. Many jazzmen weave the styles of the "old masters" into their improvisions.

minds run much in the same man-ner. Brubeck and Desmond express many different moods in the course of improvising on a tune. While they improvise, Dave and Paul close their minds to the out-side world, and perceive a new world of ideas which seems to sus-pend from ensemble items of more world of ideas which seems to sus-pend from somewhere in space. They go off into a maze of contrapuntal lines which are played between Dave's plano and Desmond's alto. The audience may lose all contact with the original tune, but they can dimly perceive new and more exciting things. Modern jazz is the music of our world. We of the staff waited a reasonable length of time, and then rushed breathlessly to the Public Relations Office to open the box. Speechless with astonishment, we stared at the overwhelming response. Four whole readers had taken the trouble to reply.

Touched to the core by this heart-warming display, we proceeded to compile statistics from the data spread out before us. A definite trend soon became evident. Every one of the four had a different idea as to how the Albrightian should be TIID.

Having thus proceeded to our original position, a point suspended somewhere between the demands of the faculty that we revolute intellectually and the cries of our fellows that we startle them with sex and sensationalism, we voted to print what we wanted to read, and retired to the SUB for coffee.

Lions Hopeful This year the Lions hope to avenge last years defeat and prob-ably have their best chance to do so of the last few years. Coach Gulian will probably depend on the veterans Conrad, Foreman, Riddell and Pryor in an attempt to stop the Owls. The game will be an im-portant one for both teams and it should be one of the hardest fought of the Lions games.

Bisons Defeat Lions, 102-87

A speedy Bucknell quintet, utilizing the fast break and good outside shots, defeated Albright 102 to 87 last Tuesday evening at Lewisburg. The Bisons, paced by Joe Bacilli's 31 points, jumped away to a 12-0 lead before Mike DePaul split the cords with a long set shot for Albright. The Lions, down 59-36 in the first half, netted the first seven points of the second half before Bucknell could score, but then faded as the Bisons unleashed a terrific showing of speed and shooting skill. With ten minutes left in the game, Bucknell turned to a deliberate style of ball in order to stop Albright, who was coming fast at that time.

DePaul High Scorer

Mike DePaul and George Conrad were high for Albright with 25 and 22 points respectively. DePaul's points came mostly on long set shots and jump shots from the foul line while Conrad hit on long one-handers, jumps, and drive-ins. Jim Foreman also hit double figures

Foreman also int double ngures with 12 points. John Beatty and Norm Vorhees followed Bacilli with 17 and 16 points apiece while Bingo Corrigan, Morty Tannenbaum and Bill Brad-way each had 11 for the Bisons.

Fouls Make the Difference

Both teams connected for 35 field goals, but the Bisons hit on a sensa-tional 61 per cent of their attempts, as compared to Albright's 40 per cent. Fouling was the difference as Bucknell sank 32 of 41 foul shots while Albright made good on 17 of 95 fore theory externate 25 free throw attempts.

The victory was revenge for Coach Ben Kribbs whose Bisons were de-feated twice by Albright last year. The Lions will play host to Buck-

those twelve or fifteen, the talent thins out, and the next twelve are likely not to be as good as our own. Thus when their ability is spread out, the small school such as Al-bright has a much better chance."

When asked about the changes in basketball rules, Gullan replied, "The foul rule won't make much difference except to raise the scores, but the two halves instead of four separate quarters will tend to wear down the players. This will again handicap the small school with the smaller squad."

Studying

Did you ever try to study in Selwyn Hall? Believe me it's prac-tically impossible. You get all set-tied at your desk for a long night of work when you hear the sound of your favorite tune on your next door roomie's radio. The odor of chocolate cake is enough to put a damper on anyone's good intentions of work. Finally your favorite sta-tion goes off the air, the last crumbs of the chocolate cake are eaten, your noisy roomies go to bed and you can begin burning the midnight oil! But who can study after a hard day? Oh well, maybe I'll have better luck tomorrow night.
