However, unlike the wide-ly heralded heroes of the great epic who did their desperate deeds en masse with the presence of each of their brethren to exhort them on to even greater deeds, the Albright Salesmen army was divided into sev-eral corps. Another advantage that Tennyson's horsemen had over the Albright knights of the sample case is that their combat, though ex-tremely exciting and dendly while it lasted, didn't last so long. On the other hand the Salesmen's charge endured all summer, with the re-opening of school mercifully putting an end to further hostilities. Half a yard, half a yard, half a

#### THE ALBRIGHT SPIRIT

THE ALBRIGHT SPIRIT In a group of Albright students the question was recently raised, "What is the Albright Spirit?" It was then discovered that this term had never been analyzed. With the present large Freshman class as yet unfa-miliar with this term as well as for the benefit of other students who wish or desire to compare their qualities with the defined standard the Bulletin has endeavored to give this term a satisfactory meaning. To the Alum-ni and friends it may be considered as an analysis of the student life as we believe that each quality is In and friends it may be considered as an analysis of the student life as we believe that each quality is found in the majority of the students involved. There are certainly exceptions but we have tried to define the code of morals of the representative student body.

the first place the Albright student sources is less occasion for censoring students at Al-on account of activity than in any other quality. Ther A fact that makes this activity expecially valuable is the willingness which is nearly always combined with it. The majority of students are willing to do something for anyone anytime. The student organizations have

for anyone anytime. The student organizations have no use for honorary members. The second indicator of the Albright Spirit is loyal-ty. Loyalty to school, classmate, teacher, friend is rarely violated. This quality may be traced through the classes which have left the school in former years. The loyalty in each and everyone is indelibly impressed by the associations formed during the terms at school. The unloyal student never feels comfortable at Albrig

Faithfulness is found in a high degree as a part of the Albright Spirit. A promise is a promise, A task to which one is obligated must be performed. The Albright student is courteous. Every student

The Albright student is courteous. Every student in the institution soon realizes the value of courtesy. Authority is respected as well as seniority. A younger student regards his older friend as a true adviser. He carefully follows the advice of his professor. When unpleasant things occur he hides them and meets the situation with a smile. For assistance he is always grateful. A discourteous student at Albright is with-out friend. out friend

out friend. The Albright student is reverent. Aside from the fact that certain religious services have compulsory attendance there is always a willingness on the part of students to attend. Profanity is out of style. The Albright student is continually seeking the best through the religious associations of school and campus. As a final quality, the tribute of the Alumni; the Albright personality is successful. He will not be con-tent with a mediocre attains only a triumphant suc-cess. The unsuccessful student is not a typical Al-brightan. brightian.

Through the summary of the qualitative analysis of the Albright Spirit it should be defined as the de-velopment of an active, loyal, faithful, courteous, rev-erent personality content with nothing short of the highest success.

#### THE FRESHMAN IN SCHOOL ACTIVITIES

After the school curriculum is arranged and after the newness of their environment has adjusted itsolf to the regular and commonplace it has always been no ticed that the Freshman student turns toward the extra-curricular as found in the school activities. This branch of the students work is as large as he cares to make it, and quite frequently it is larger than the prospective applicant realizes. At Albright nearly every school activity bases its

promotion of workers on a competitive basis. The place for a student to enter work outside the sphere of his regular studies is at the bottom and he may then work The place up. The work at the bottom is often very elementary, but it is only in doing the casy well that the accomp-lishment of the difficult is attained. A Freshman boy or girl should not feel humiliated if he is only a reportfor the Bulletin, or if he is requested to conditi letes or carry water, or if he is not selected to ss office. The scrubs become the assistants. ndition class office.

class office. The scrubs become the assistants. Aside from the fact of being disappointed at hav-ing to start in at the bottom of the ladder Freshmen sometimes make the mistake of entering too many ex-tra-curricular activities and do so at the expense of both studies and the proficiency of the activities they have engaged in. No doubt the point system in this line would greatly diminish trouble from this end, but as such a means is not in force at Albright this should ine would greatly diminish trouble from this end, but as such a means is not in force at Albright this should be carefully guarded against by the Freshman. Parti-cipation in two or three recognized school activities should afford every one enough liberly for the display of talent as well as a means for the cultivation of executive power.

cutive power. In every school there is a class of persons who re-fuse to do or fail to interest themselves in anything outside their studies. This is possibly the reason that there are always some who fail to find the interest in college, which they expected to find and are always getting homesick. As a remedy for the latter there is possibly no better medicine which an old student can recommend than a wholesome, active, interest in a defi-

recommend than a wholesome, active, interest in a defi-nate activity. You will find a chance to engage in athletic work, in musical work, in publication work, or in oratorical work as you choose and prefer. Anyone can direct you to the proper person for reporting. Think it over, decide what you would like to do, do it, and do it well.

#### THE CAMPUS

Last year we had an issue of the Bulletin dedicated to the campus and it's beauties. Then the trees were all dressed in bridal attire and everything merited the praise dressed in bridal attire and everything merited the praise so extravagantly given. Again the campus is lovely, although now the trees are donning their autumn lay-out of bright-tinted frocks, but with the lawn and walks in perfect condition and everything about them a de-light to the eye, let us do our part in keeping them that way. Let us place the things designed for waste-cans where they belong, because when dropped on the cam-pus the wind refuses to become an accessory to crime and carry them away, so there they remain to be a continual eyesore. Pride in the well-being of our cam-pus should make us willing to do this.

### GETTING STARTED

**GETTING STARTED** The first and a part of the seek ad week of school have passed, soon to become ancient history. By this time all of us have become acclimated, in part at least, to our new environment. Classes have been assigned and are meeting regularly. Even the Prep School is under way, which is something new for Albright at such an early date. Of course even the we are started, we are ONLY started but seek was expected to see thime maying only state. Or course even no we are stated, we are ONLY stated, but soon we expect to see things moving along smoothly, and at a rapid pace. Looking to our team we are both astonished and delighted to see its quick pick up. This we know will have its desired ef-fect upon the entire student body and aid us all to get going

Albright College is in full swing Albright College is in full swing for the year of 1926-27. All dur-ing the bright shiny hours of last Tuesday students from all parts of the state and the neighboring states came pouring into Myerstown bound for Albright, the college of their choice. To see them streaming in from all kinds of conveyances, au-tomobiles, trolleys, trains, with some merely flivers was a sight enjoyable to see. to se

sually large numb An unusually large number of students have enrolled. The dormi-tories, both the boys and girls, are crowded to capacity. The college dining room, too, is well filled. For a full period of several weeks the college stewardess and her willing staff of cohorts have been busily en-eased in prenaring to satisfy the staff of cohorts have been busily en-gaged in preparing to satisfy the hearty appetites of the students. Things are humming around the dorms also with everybody trying to get organized. The halls are fairly teeming with industrious workers who are already accomplishing won-ders in getting their rooms fixed up.

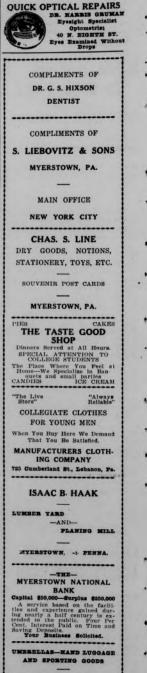

The outstanding feature of the matriculation returns is the large number of old students who are reurning. With only a few exceptions, two of which were accounted for by the darts of Dan Cupid which found their way to the hearts of two of last year's students, one a Junior and the other a Frosh, almost every old student is returning. This happy fact together with a large number of Freshmen who are matriculating, of Freshmen who are matriculating, their exact number being impossible to ascertain as yet, exalt make up for the large graduating class of last year, a total of fNV. This number will be easily reviewed with a large overflow. Kupe the crowded condi-tion of the Jorms. Another fact of conside whe note is that the percent-age of boarding students is consid-erable increased over last year. All in all. Albright is anoarently

ex.0/ mcreased over last year. All in all, Albright is apparently lue for a big year scholastically as well as athletically, which now seems sure. Dormitories are improved to accommodate the increased number of students—better library facili-ties are offered, with a trained librar-ion who provides to theorempty re-are the second s ties are offered, with a trained librar-ian who promises to thoroughly re-novate and rejeuvinate the library for the greater more efficient use of the students. Last, but far from least, the new instructors are well liked by the students which means much in the successful pursuit of the ensuing collegiate year.

Although the gang was impressed it was not so loyal, for when the smoke of the fire had cleared away and the savor of the cats disappeared, it was found that only two were loyal to him. They were Leon Hood and Charles Heinze. As soon as the summer vacation he. were Leon nooa and Charles Heinze. As soon as the summer vacation be-gan, the T. A. C. U. speeded up production. Both these boys went around with Reiley's idea—The health method of Cooking—sold the idea for forty dollars and then gave their victure a complete surply of their victims a complete supply of heavy cast aluminum cooking uten-sils for nothing. Great, wasn't it? They merely made demonstrations in sils for nothing. Great, wasn't it? They merely made demonstrations in the evening which General Hood said was duck soop to get, then go around to the ladies fortunate enough to be there and chalk up their orders. Hood's theatre of ac-tivity was Jersey Shore and his home town of Williamsport, Pa. where he hid very well, especially towards the latter part of the season. Heinze took Johnstown, his home town also, and seems to have met with a fair measure of success, the exact degree being undeterminable, as he did not return to tell the boys about it. The Donald Brush Co. had the

return to tell the boys about it. The Donald Brush Co. had the largest number of loyal supporters. It was organized by "Boss" Whit-moyer, who is a veteran in the brush game, having worked with both the Donald and Fuller Companies last summer. By tireless and unceasing efforts he roped in Weller, Beshore, Zener and Heckert to his cause. Taking a vacation of a few days af-ter commencement day last year, the entire crew assembled in Pennsyl-vania's own anthricite region, with Weller busily engaged in his home town, Mount Carmel and the rest at Ashland, nigh unto it. After a so-journ of three weeks here, in which the latter two took the town proper, and neighboring towns, using Whit-moyer's car to a great advantage. Here they were given a merry chase is two rival companies, which came in town almost simultaneously, with Zener and Heckert taking it on the chin, but with their companions get-ting the jump on their unwelcome rivals. She will enroll at Albright next year. Heckert couldn't stand prosperity, so he thought he was good enough to take Williams-port for the final two weeks, while Zener completed his summer's cam-

Zener completed his summer's cam-paigning in Frackville. Meanwhile, Beshore and Whit-moyer continued to go strong. From Ashland they went to Fine Grove, thence to Schuylkill Haven where they saw Paul Hartranft quite fre-quently. They liked the work and the place, and in between times made good use of their automobile, on lit-tle escapades and excursions. Mean-while Dan Weller was going like tle escapades and excursions. Mean-while Dan Weller was going like a house on fire over in Mt. Carmel and its protege, Centralia. So suc-cessful was Dan that he soon bought a flivver for the more efficient pur-suit of his profession, epuipping it with all the sundries and extras on the market, which, however, were probably intended for other purposes. Russel Loucks took George Weiss' place with the Pictorial Review Co. and had a great summer. He had little trouble reaching his required quota, and had lots of fun on the side. He was with some of the quota, and had lots of fun on the side. He was with a gang of other college boys, the Pictorial Review method of campaigning, and had for his headquarters Norristown and Al-lentown.
